COMMENTS ON EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Sir:

The Notice of Allowability mailed December 21, 2005 included, as an attachment, a statement of reasons for allowance.

However, not all of the features cited by the Examiner accurately reflect what is recited in the independent claims.

For example, the independent claims do not recite "a laminated piezoelectric element including lower and upper electrodes on a base element."

For another example, the independent claims do not recite "at least one of two electrodes is an La-doped single oriented crystal or monocrystal oxide film containing Sr and Ti." Rather, allowed independent Claims 1 and 13 recite "at least said lower

electrode of said two electrodes is an La-doped single orientated crystal or monocrystal oxide film containing Sr and Ti."

Nevertheless, Applicants respectfully submit that each of the pending claims is allowable for its combination of claimed features.

Applicants' undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

  
Douglas W. Pinsky  
Attorney for Applicants
